Thin Solid Films 295 (1997) 323–327

thin solid films

Subject Index of Volume 295

Aggregation
optical absorption spectra of mixed merocyanine dye Langmuir–Blodgett films, 73
AlN/Al_2O_3 composite
aluminum nitride and alumina composite film fabricated by DC plasma processes, 142
Aluminium
anodic oxidation of zirconium covered with a thin layer of aluminium, 156
the interdiffusion and the feasibility of Al/Mo/Ni/(Pb–Sn) as a solder bump system, 218
Aluminium nitride
alN thin film deposition by pulsed laser ablation of Al in NH_3, 77
Amorphous materials
a possible method for large area deposition of a-Si:H thin films using electron cyclotron resonance plasma-enhanced chemical vapor deposition, 67
deformation of polymer films by bending forces, 199
conductivity dependence on the thickness of hydrogenated, amorphous silicon–carbon films, 287
Anisotropy
surface deformation of the InGaN thin films deposited on a sapphire substrate, 193
Anodic oxidation
local field in anodic oxide films on valve metals, 295
Atomic force microscopy
growth process of cubic boron nitride films in bias sputter deposition, 137
supramolecular structures formed from heterocyclic aromatic molecules, 241
Auger electron spectroscopy
friction and wear of the film formed in an oil immersion test under a nitrogen atmosphere, 19

Band structure
burstein shift and UV photoresponse in IBAD-deposited transparent conducting ZnO films, 83
the temperature dependence of the direct gap of β-$FeSi_2$ films, 147
structure and optical properties of C_{60} thin films, 283
Biomaterials
electrical properties of hydroxyapatite thin films grown by pulsed laser deposition, 214
Boron nitride
growth process of cubic boron nitride films in bias sputter deposition, 137

Cadmium
fabrication of cadmium oxide thin films using the Langmuir–Blodgett deposition technique, 260
Cadmium telluride
structural properties of oxygenated amorphous cadmium telluride thin films, 131
Carbon
surface hardening of AISI 316L stainless steel using plasma carburizing, 185
structure and optical properties of C_{60} thin films, 283
Carboxylic acids
stabilisation of fatty acid mono- and multilayers by simultaneous polyelectrolyte complexation and salt formation with cadmium ions, 246
Ceramic
alumina strengthening by silica sol–gel coating, 101
Chemical vapor deposition (CVD)
investigation of chemical vapor deposition of silicon by surface-enhanced Raman scattering, 5
effect of the substrate on the growth of spinel iron oxide thin films by metal–organic chemical vapor deposition, 16
effect of chamber pressure on p-type μc-SiC:H thin films prepared by photo-CVD, 37
a possible method for large area deposition of a-Si:H thin films using electron cyclotron resonance plasma-enhanced chemical vapor deposition, 67
crystalline structures of the $PbTiO_3$ films prepared using the ECR PECVD method, 299
Chromium nitride
study of the growth mechanisms of chromium nitride films deposited by vacuum ARC evaporation, 43
Coatings
alumina strengthening by silica sol–gel coating, 101
optical coatings on polymethyl methacrylate and polycarbonate, 122
Cobalt
study of lattice stress in Re/Co thin films and superlattices with the perturbed angular correlations technique, 24
Computer simulations
deformation of polymer films by bending forces, 199
supramolecular structures formed from heterocyclic aromatic molecules, 241
Conductivity
conductivity dependence on the thickness of hydrogenated, amorphous silicon–carbon films, 287
Contacts
on mechanical contacts to porous silicon, 305
Corrosion
aluminum nitride and alumina composite film fabricated by DC plasma processes, 142
influence of the formation conditions of TiN coatings on their electrochemical behaviour in sulphuric acid and sodium chloride solutions, 178
Crystallization
recrystallization and diffusion in sodium-implanted silicon, 169
crystalline structures of the $PbTiO_3$ films prepared using the ECR PECVD method, 299

Elsevier Science S.A.

Deposition processes
investigation of chemical vapor deposition of silicon by surface-enhanced Raman scattering, 5
study of the growth mechanisms of chromium nitride films deposited by vacuum ARC evaporation, 43
alN thin film deposition by pulsed laser ablation of Al in NH_3, 77
characterization and optimization of zinc oxide films by r.f. magnetron sputtering, 87
Diamond
non-destructive evaluation of diamond and diamond-like carbon films by laser induced surface acoustic waves, 107
Diamond-like carbon
non-destructive evaluation of diamond and diamond-like carbon films by laser induced surface acoustic waves, 107
Dielectric properties
electrical properties of hydroxyapatite thin films grown by pulsed laser deposition, 214
local field in anodic oxide films on valve metals, 295
Diffusion
observation of post-deposition resistance relaxation during growth of semicontinuous metal films, 315

Electrical conductivity
optimization of sputtered ITO films with respect to the oxygen partial pressure and substrate temperature, 151
Electrical properties
high quality zinc oxide films by pulsed laser ablation, 104
electrical properties of hydroxyapatite thin films grown by pulsed laser deposition, 214
Electrical properties and measurements
effect of chamber pressure on p-type μc-SiC:H thin films prepared by photo-CVD, 37
electrical and optical properties of Sb:SnO_2 thin films obtained by the sol–gel method, 95
on the conduction mechanism in plasma polymerized m-xylene thin films, 125
a study of the interaction between nitrogen dioxide and lead phthalocyanine using electrical conduction and optical absorption, 277
on mechanical contacts to porous silicon, 305
observation of post-deposition resistance relaxation during growth of semicontinuous metal films, 315
Electron beam effects
observation of a novel electron beam effect: electron-stimulated associative desorption, 8
Electronic devices
delayed luminescence of some components of optoelectronic devices, 224
Electronic structure
optical transitions in Si/Ge superlattices, 206
Electron spin resonance
electron spin resonance of Cu-porphyrin of dimer-type in Langmuir–Blodgett films, 92
Electron stimulated associative desorption
observation of a novel electron beam effect: electron-stimulated associative desorption, 8
Ellipsometry
ellipsometric studies on uranyl arachidate Langmuir–Blodgett films, 210
Epitaxy
excitation dependence of photoluminescence linewidth in InAlAs grown on InP substrates by molecular beam epitaxy, 310

Fluorescence
fabrication and fluorescence characterization of the LB films of luminous rare earth complexes Eu(TTA)$_3$Phen and Sm(TTA)$_3$Phen, 228
Fourier transform infrared spectroscopy (FTIR)
fabrication and fluorescence characterization of the LB films of luminous rare earth complexes Eu(TTA)$_3$Phen and Sm(TTA)$_3$Phen, 228
a study of the interaction between nitrogen dioxide and lead phthalocyanine using electrical conduction and optical absorption, 277
Friction
friction and wear of the film formed in an oil immersion test under a nitrogen atmosphere, 19

Glass
delayed luminescence of some components of optoelectronic devices, 224
Glow discharge
surface hardening of AISI 316L stainless steel using plasma carburizing, 185

Hardness
aluminum nitride and alumina composite film fabricated by DC plasma processes, 142
surface hardening of AISI 316L stainless steel using plasma carburizing, 185
surface deformation of the InGaN thin films deposited on a sapphire substrate, 193
deformation of polymer films by bending forces, 199
Heat treatment
surface hardening of AISI 316L stainless steel using plasma carburizing, 185
Hydrogen
grain size effects on H_2 gas sensitivity of thick film resistor using SnO_2 nanoparticles, 271

Indium oxide
delayed luminescence of some components of optoelectronic devices, 224
Indium tin oxide
optimization of sputtered ITO films with respect to the oxygen partial pressure and substrate temperature, 151
Infrared spectroscopy
on the conduction mechanism in plasma polymerized m-xylene thin films, 125
Interfaces
the interdiffusion and the feasibility of Al/Mo/Ni/(Pb–Sn) as a solder bump system, 218
conductivity dependence on the thickness of hydrogenated, amorphous silicon–carbon films, 287
Internal stress
influence of substrate properties on the growth of titanium films. Part I, 60
Ion bombardment
surface orientation and structure of ion beam processed TiN films, 1
Ion implantation
recrystallization and diffusion in sodium-implanted silicon, 169
influence of the formation conditions of TiN coatings on their electrochemical behaviour in sulphuric acid and sodium chloride solutions, 178
Iron oxide
effect of the substrate on the growth of spinel iron oxide thin films by metal–organic chemical vapor deposition, 16

Langmuir–Blodgett films (LB films)
application of cellulose Langmuir–Blodgett films as humidity sensors, and characteristics of the sorption of water molecules into polymer monolayers, 53
optical absorption spectra of mixed merocyanine dye Langmuir–Blodgett films, 73
electron spin resonance of Cu-porphyrin of dimer-type in Langmuir–Blodgett films, 92

ellipsometric studies on uranyl arachidate Langmuir–Blodgett films, 210
fabrication and fluorescence characterization of the LB films of luminous rare earth complexes Eu(TTA)$_3$Phen and Sm(TTA)$_3$Phen, 228
an on-trough polymerization study of pyrrole derivatives, 234
supramolecular structures formed from heterocyclic aromatic molecules, 241
preparation and characterization of mixed LB films of polyaniline and cadmium arachidate, 255
fabrication of cadmium oxide thin films using the Langmuir–Blodgett deposition technique, 260
spectral properties of aggregates in adsorbed dye monolayer films, 266

Lanthanides
fabrication and fluorescence characterization of the LB films of luminous rare earth complexes Eu(TTA)$_3$Phen and Sm(TTA)$_3$Phen, 228

Laser deposition
electrical properties of hydroxyapatite thin films grown by pulsed laser deposition, 214

Luminescence
delayed luminescence of some components of optoelectronic devices, 224
excitation dependence of photoluminescence linewidth in InAlAs grown on InP substrates by molecular beam epitaxy, 310

Metals
complex formation between monolayers of long-chain imidazole and benzimidazole derivatives and transition metal ions, 250
observation of post-deposition resistance relaxation during growth of semicontinuous metal films, 315

Molecular beam deposition
scanning force microscopy of polyimide surfaces, 162

Molecular beam epitaxy (MBE)
excitation dependence of photoluminescence linewidth in InAlAs grown on InP substrates by molecular beam epitaxy, 310

Molybdenum oxide
high-rate dual-target d.c. magnetron sputter deposition of electrochromic MoO_3 films, 117

Monolayers
application of cellulose Langmuir–Blodgett films as humidity sensors, and characteristics of the sorption of water molecules into polymer monolayers, 53
surface deformation of the InGaN thin films deposited on a sapphire substrate, 193
an on-trough polymerization study of pyrrole derivatives, 234
stabilisation of fatty acid mono- and multilayers by simultaneous polyelectrolyte complexation and salt formation with cadmium ions, 246
complex formation between monolayers of long-chain imidazole and benzimidazole derivatives and transition metal ions, 250
preparation and characterization of mixed LB films of polyaniline and cadmium arachidate, 255
spectral properties of aggregates in adsorbed dye monolayer films, 266

Multilayers
stabilisation of fatty acid mono- and multilayers by simultaneous polyelectrolyte complexation and salt formation with cadmium ions, 246

Nanostructure
grain size effects on H_2 gas sensitivity of thick film resistor using SnO_2 nanoparticles, 271

Optical coatings
optical properties of Ta_2O_5 thin films deposited using the spin coating process, 11

Optical properties
optical properties of Ta_2O_5 thin films deposited using the spin coating process, 11
burstein shift and UV photoresponse in IBAD-deposited transparent conducting ZnO films, 83
electrical and optical properties of Sb:SnO_2 thin films obtained by the sol–gel method, 95
high quality zinc oxide films by pulsed laser ablation, 104
high-rate dual-target d.c. magnetron sputter deposition of electrochromic MoO_3 films, 117
optical coatings on polymethyl methacrylate and polycarbonate, 122
optical transitions in Si/Ge superlattices, 206
delayed luminescence of some components of optoelectronic devices, 224
a study of the interaction between nitrogen dioxide and lead phthalocyanine using electrical conduction and optical absorption, 277

Optical spectroscopy
optical absorption spectra of mixed merocyanine dye Langmuir–Blodgett films, 73
the temperature dependence of the direct gap of β-$FeSi_2$ films, 147
complex formation between monolayers of long-chain imidazole and benzimidazole derivatives and transition metal ions, 250
spectral properties of aggregates in adsorbed dye monolayer films, 266
a study of the interaction between nitrogen dioxide and lead phthalocyanine using electrical conduction and optical absorption, 277
structure and optical properties of C_{60} thin films, 283

Organic substances
optical coatings on polymethyl methacrylate and polycarbonate, 122
a study of the interaction between nitrogen dioxide and lead phthalocyanine using electrical conduction and optical absorption, 277

Oxidation
structural properties of oxygenated amorphous cadmium telluride thin films, 131
anodic oxidation of zirconium covered with a thin layer of aluminium, 156

Oxides
fabrication of cadmium oxide thin films using the Langmuir–Blodgett deposition technique, 260
local field in anodic oxide films on valve metals, 295

Photochromes
development, properties and applications of a photochromic adaptive filter, 31

Photochromic adaptive filter
development, properties and applications of a photochromic adaptive filter, 31

Photoinduced absorption
development, properties and applications of a photochromic adaptive filter, 31

Photoresponse
burstein shift and UV photoresponse in IBAD-deposited transparent conducting ZnO films, 83

Physical vapour deposition (PVD)
study of the growth mechanisms of chromium nitride films deposited by vacuum ARC evaporation, 43

Plasma processing and deposition
on the conduction mechanism in plasma polymerized m-xylene thin films, 125
aluminum nitride and alumina composite film fabricated by DC plasma processes, 142
scanning force microscopy of polyimide surfaces, 162
crystalline structures of the $PbTiO_3$ films prepared using the ECR PECVD method, 299

Polymers
application of cellulose Langmuir–Blodgett films as humidity sensors,

and characteristics of the sorption of water molecules into polymer monolayers, 53
on the conduction mechanism in plasma polymerized m-xylene thin films, 125
scanning force microscopy of polyimide surfaces, 162
deformation of polymer films by bending forces, 199
an on-trough polymerization study of pyrrole derivatives, 234
stabilisation of fatty acid mono- and multilayers by simultaneous polyelectrolyte complexation and salt formation with cadmium ions, 246
preparation and characterization of mixed LB films of polyaniline and cadmium arachidate, 255

Raman scattering
investigation of chemical vapor deposition of silicon by surface-enhanced Raman scattering, 5
Reacted film
friction and wear of the film formed in an oil immersion test under a nitrogen atmosphere, 19
Reactive pulsed laser ablation
alN thin film deposition by pulsed laser ablation of Al in NH_3, 77
Resistivity
fabrication of cadmium oxide thin films using the Langmuir–Blodgett deposition technique, 260
on mechanical contacts to porous silicon, 305
observation of post-deposition resistance relaxation during growth of semicontinuous metal films, 315
RHEED
Surface orientation and structure of ion beam processed TiN films, 1
Rhenium
study of lattice stress in Re/Co thin films and superlattices with the perturbed angular correlations technique, 24

Scanning force microscopy
scanning force microscopy of polyimide surfaces, 162
Secondary ion mass spectrometry
anodic oxidation of zirconium covered with a thin layer of aluminium, 156
Semiconductors
a possible method for large area deposition of a-Si:H thin films using electron cyclotron resonance plasma-enhanced chemical vapor deposition, 67
the temperature dependence of the direct gap of β-$FeSi_2$ films, 147
optical transitions in Si/Ge superlattices, 206
excitation dependence of photoluminescence linewidth in InAlAs grown on InP substrates by molecular beam epitaxy, 310
Sensors
application of cellulose Langmuir–Blodgett films as humidity sensors, and characteristics of the sorption of water molecules into polymer monolayers, 53
grain size effects on H_2 gas sensitivity of thick film resistor using SnO_2 nanoparticles, 271
Silicides
the temperature dependence of the direct gap of β-$FeSi_2$ films, 147
Silicon
investigation of chemical vapor deposition of silicon by surface-enhanced Raman scattering, 5
a possible method for large area deposition of a-Si:H thin films using electron cyclotron resonance plasma-enhanced chemical vapor deposition, 67
recrystallization and diffusion in sodium-implanted silicon, 169
on mechanical contacts to porous silicon, 305
Silicon carbide
effect of chamber pressure on p-type μc-SiC:H thin films prepared by photo-CVD, 37
conductivity dependence on the thickness of hydrogenated, amorphous silicon–carbon films, 287
Silicon oxide
delayed luminescence of some components of optoelectronic devices, 224
Silver
complex formation between monolayers of long-chain imidazole and benzimidazole derivatives and transition metal ions, 250
Sodium
recrystallization and diffusion in sodium-implanted silicon, 169
Sol-gel
alumina strengthening by silica sol–gel coating, 101
Spinel $Fe_3O_{4+\delta}$
effect of the substrate on the growth of spinel iron oxide thin films by metal–organic chemical vapor deposition, 16
Sputtering
characterization and optimization of zinc oxide films by r.f. magnetron sputtering, 87
high-rate dual-target d.c. magnetron sputter deposition of electrochromic MoO_3 films, 117
growth process of cubic boron nitride films in bias sputter deposition, 137
the interdiffusion and the feasibility of Al/Mo/Ni/(Pb–Sn) as a solder bump system, 218
Steel
influence of the formation conditions of TiN coatings on their electrochemical behaviour in sulphuric acid and sodium chloride solutions, 178
Strength
alumina strengthening by silica sol–gel coating, 101
Stress
study of lattice stress in Re/Co thin films and superlattices with the perturbed angular correlations technique, 24
Structural properties
Surface orientation and structure of ion beam processed TiN films, 1
effect of chamber pressure on p-type μc-SiC:H thin films prepared by photo-CVD, 37
high quality zinc oxide films by pulsed laser ablation, 104
preparation and characterization of mixed LB films of polyaniline and cadmium arachidate, 255
structure and optical properties of C_{∞} thin films, 283
Substrate properties
influence of substrate properties on the growth of titanium films. Part I, 60
Superlattices
study of lattice stress in Re/Co thin films and superlattices with the perturbed angular correlations technique, 24
optical transitions in Si/Ge superlattices, 206
Surface acoustic waves
non-destructive evaluation of diamond and diamond-like carbon films by laser induced surface acoustic waves, 107
Surface analyses
aluminum nitride and alumina composite film fabricated by DC plasma processes, 142
Surface and interface states
an on-trough polymerization study of pyrrole derivatives, 234
Surface roughness
structural properties of oxygenated amorphous cadmium telluride thin films, 131
growth process of cubic boron nitride films in bias sputter deposition, 137
ellipsometric studies on uranyl arachidate Langmuir–Blodgett films, 210

Tantalum
optical properties of Ta_2O_5 thin films deposited using the spin coating process, 11

Thin films
development, properties and applications of a photochromic adaptive filter, 31
Tin
the interdiffusion and the feasibility of Al/Mo/Ni/(Pb–Sn) as a solder bump system, 218
Tin oxide
electrical and optical properties of Sb:SnO_2 thin films obtained by the sol–gel method, 95
grain size effects on H_2 gas sensitivity of thick film resistor using SnO_2 nanoparticles, 271
Titanium films
influence of substrate properties on the growth of titanium films. Part I, 60
Titanium nitride
surface orientation and structure of ion beam processed TiN films, 1
influence of the formation conditions of TiN coatings on their electrochemical behaviour in sulphuric acid and sodium chloride solutions, 178
Transmission electron microscopy
anodic oxidation of zirconium covered with a thin layer of aluminium, 156
Wear
friction and wear of the film formed in an oil immersion test under a nitrogen atmosphere, 19

X-ray diffraction
supramolecular structures formed from heterocyclic aromatic molecules, 241
crystalline structures of the $PbTiO_3$ films prepared using the ECR PECVD method, 299
X-ray photoelectron spectroscopy
structural properties of oxygenated amorphous cadmium telluride thin films, 131

Zinc oxide
burstein shift and UV photoresponse in IBAD-deposited transparent conducting ZnO films, 83
characterization and optimization of zinc oxide films by r.f. magnetron sputtering, 87
Zirconium
anodic oxidation of zirconium covered with a thin layer of aluminium, 156
ZnO
high quality zinc oxide films by pulsed laser ablation, 104
